SUMMARY

Full-Stack Web Developer and B.Tech Computer Science student (CGPA: 8.34) with hands-on experience building production-ready web applications using **React.js, Node.js, Express.js, and MongoDB**. Developed and deployed 5+ projects including property listing platforms, flight booking systems, and real-time dashboards. Strong foundation in **Data Structures & Algorithms, REST API design, and database management**. Seeking a Software Developer role to apply full-stack development skills in a fast-paced engineering team.

SKILLS

Programming Languages: C++, Java, JavaScript (ES6+), SQL

Frontend Development: React.js, Redux, HTML5, CSS3, Tailwind CSS, Responsive Web Design **Backend**

Development: Node.js, Express.js, RESTful API Development, JWT Authentication **Databases:** MongoDB, MongoDB Atlas, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Vercel, Netlify, Render

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

PROJECTS

Airbnb Clone — Full-Stack Property Listing Platform

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Vercel, Render

- Designed and developed a full-stack Airbnb clone enabling users to browse, search, filter, and book 50+ rental properties with a responsive UI built using React.js and Tailwind CSS.
- Engineered 15+ RESTful API endpoints using Node.js and Express.js for property CRUD operations, user authentication, booking management, and review submission.
- Implemented secure user authentication and authorization using JWT tokens and bcrypt password hashing, reducing unauthorized access attempts.
- Integrated MongoDB Atlas for scalable cloud database storage with geolocation-based property search and indexing.
- Deployed frontend on Vercel and backend on Render with environment-based configuration management for production readiness.

Flight Booking System — Dynamic Pricing Platform

React.js, Node.js, Express.js, MongoDB

- Built a flight booking platform with real-time flight availability updates, dynamic pricing engine, and seat selection functionality.
- Created an admin dashboard for managing flight schedules, pricing tiers, and booking analytics with role-based access control.
- Developed RESTful APIs for search, booking, payment processing, and user profile management.

Weather Dashboard — Real-Time Weather Application

React.js, OpenWeatherMap API, CSS3, localStorage

- Built a responsive weather application displaying real-time weather data and 5-day forecasts for 200+ cities with geolocation-based auto-detection.
- Implemented dynamic UI updates rendering temperature, humidity, wind speed, and visibility metrics with animated weather icons from OpenWeatherMap API.
- Added city search with autocomplete suggestions and persistent recent search history using localStorage.

Tic-Tac-Toe Game — Interactive Web Application

React.js, JavaScript (ES6+), CSS3

- Developed an interactive Tic-Tac-Toe game using React functional components and hooks for efficient state management.
- Implemented win/draw detection algorithm, move history tracking, and time-travel feature with score persistence and responsive mobile-friendly design.

EDUCATION

Bachelor of Technology in Computer Science

I.T.S. Engineering College, Greater Noida, Uttar Pradesh | 2022 – 2026 | CGPA: 8.34 / 10 (Till 7th Semester)

CERTIFICATIONS

- Machine Learning Training — Intel
- Data Structures & Algorithms — Infosys Springboard
- Java Full Stack Development — Wipro TalentNext
- JavaScript — Youtube
- React and Redux — Youtube
